

# Case Study Booklet

## *Directions:*

You will be creating a booklet regarding the analysis of tools and tool marks, and how each assists in the results of criminal cases.

1. Select a criminal case in which a tool mark assisted in solving the crime.
2. Conduct research about the case, fully understanding how the crime was committed and how the evidence was analyzed and used in court.
3. Create a booklet about your case. Follow the following criteria to complete your *Project*:
  - The title of the *Project* should be the title of your case
  - Describe the crime
  - Describe the tool which was used
  - Discuss the properties of the tool and the type of marks it can make
  - Describe how the tool was used in your case study and the type(s) of marks it created
  - Discuss the procedures investigators used which enabled them to identify the type of tool and the specific tool
  - Present the final result of the criminal case
4. Be creative and use images to help with the presentation of your booklet/handout.
5. Cite all sources used to complete this *Project*.
6. Be prepared to share your booklet with the class.
