

Preliminary Blood Tests

Directions:

1. Using the Internet, locate a credible video in which an investigator demonstrates preliminary test(s) at a crime scene to locate blood, with the use of green checks, hemisticks, luminol and/or bluestar methods.
2. After watching the video, write a one page summary in order to describe the procedures and important considerations the investigator described and demonstrated. Also, be sure to answer the following questions:
 - What is the purpose of conducting the preliminary test(s)
 - What supplies are needed
 - What are the benefits and drawbacks of conducting preliminary blood tests
3. Be sure to cite all sources used.
