

# Great Discoveries in Science

## *Directions:*

1. Choose a significant scientific discovery or advancement in the history of mankind. Have it approved by your teacher.
2. Research your discovery or advancement. How did it occur? Who was responsible or involved? How did it affect science and everyday life?
3. Create a Microsoft® PowerPoint® presentation detailing your findings. Include pictures and/or videos if appropriate.
4. You will present your project to the class. Be sure to dress appropriately for your presentation.
