

Science History Timeline

Directions:

You will create a timeline of key scientific advancements made throughout history.

1. Using Internet and library sources, develop a timeline of key scientific advancements made throughout history. You should include at least 10 key innovations.
2. Include pictures and/or illustrations for key components. Be creative, and make your timeline visually appealing as well as informational.
3. List all of your sources below, and turn in this page with your timeline.
